WORK EXPERIENCE

Full-Stack Developer **March 2025 – May 2026**
Lanky Groups

- Developed and maintained web and mobile applications using Angular, Go, Flutter, and MySQL.
- Delivered responsive frontend features, backend services, REST APIs, and database integrations for client and internal projects.
- Participated in code reviews, technical documentation, testing, debugging, and issue investigation.
- Used AI-assisted development tools to support requirement analysis, debugging, testing, and documentation.

Project Lead & Full-Stack Developer Intern **December 2025 – April 2026**
iReply Back Office Services Inc.

- Led the development of an HRIS and attendance system using React, PHP, MySQL, and Vite.
- Built employee management, attendance tracking, and role-based access control features.
- Developed and integrated frontend components, backend functionality, and database operations.
- Coordinated project planning, task assignments, testing, and issue resolution.
- Performed functional testing and debugging to improve system reliability and usability.

PROJECTS

Accounting & Client Management System

React, React Native/Expo, FastAPI, PostgreSQL, REST API

- Developed the web frontend and mobile application for an internal accounting and client-management platform used to manage client records, billing, VAT relief documentation, payroll-compliance records, and documents.
- Built responsive web interfaces using React and developed the mobile application using React Native and Expo, extending core system workflows to mobile devices.
- Implemented document scanning, image capture, and file upload functionality on mobile, enabling users to digitize and securely submit client documents directly from their devices.
- Integrated web and mobile interfaces with FastAPI REST APIs and PostgreSQL-backed services for authenticated data access and document management.

Restaurant POS and Inventory Management System

React, PostgreSQL, REST API

- Developed a POS and inventory system for managing menu items, customer orders, sales records, and stock levels.
- Implemented automatic inventory deductions based on completed transactions.
- Built dashboards for monitoring daily sales, low-stock products, and transaction history.
- Designed role-based workflows for administrators, cashiers, and authorized staff.

ProDuce - Web and Mobile application

PHP, MySQL, Flutter, Dart, JavaScript

- Independently designed, developed, and deployed a full-stack web and mobile marketplace as a capstone project.
- Built the Flutter mobile application, PHP backend, MySQL database, and web-based administration panel.
- Implemented vendor product management, ordering, authentication, and administrative workflows.
- Managed the complete development lifecycle, including requirements, database design, API integration, testing, debugging, and deployment.

EDUCATION

Bachelor of Science in Information Technology · University of St. Lasalle – Bacolod April, 2026

SKILLS

- **Frontend Development:** React, Angular, HTML5, CSS3, Bootstrap, JavaScript, TypeScript, Next.js
- **Backend Development:** Go, PHP, Laravel, REST API Development, API Integration
- **Mobile Development:** Flutter, Dart, React Native
- **Database:** MySQL, Firebase, PostgreSQL
- **AI & Automation:** Prompt Engineering, MCP Integration, LLM Workflows, AI-Assisted Development
- **Testing & QA:** Functional Testing, Unit Testing, Integration Testing, Validation Testing, Bug Tracking, Debugging
- **Developer Tools:** Git, GitHub, Postman, Android Studio, VS Code, Figma, Jira, Bitbucket, Vite

CERTIFICATIONS & ACTIVITIES

- Dean’s Lister (2023-2025)
- Cisco Networking Academy - Switching, Routing, and Wireless Essentials
- CCS Startup Battle Participant
- DevFest Exhibition
