

DENNIS B. SEVERINO IV

dennisiv.severino@gmail.com | Philippines

Professional Summary

Full-Stack, Mobile, and AI-Assisted Developer with experience building web and mobile applications using React, PHP, Flutter, and MySQL. Skilled in frontend and backend development, QA testing, system debugging, and AI-assisted workflows including prompt engineering, documentation support, and productivity optimization. Experienced in developing scalable systems, improving development efficiency, and collaborating across software projects.

Technical Skills

- **Languages:** PHP, JavaScript, TypeScript, Dart, Python, SQL
- **Frameworks & Libraries:** React, Flutter, Bootstrap, Laravel, Go, Vite
- **Database:** MySQL, Firebase, PostgreSQL, Go
- **AI & Agent Tools:** Prompt Engineering, MCP, AI-assisted Development, LLM Workflows, Agent Tool Integration
- **Testing & QA:** Function Testing, Validation Testing, Bug Tracking, Debugging
- **Tools:** Git, GitHub, Postman, Android Studio, VS Code, Figma, Webflow

AI & Development Productivity

- AI Prompt Engineering
- Configured and used MCP servers for AI-assisted workflows and development support
- AI-assisted debugging and testing workflows
- Requirement analysis using AI tools
- Documentation and technical summarization
- Test scenario generation
- QA support and issue reproduction
- Productivity optimization using AI systems
- LLM prompting for software development assistance

Education

Bachelor of Information Technology,
University of St. Lasalle – Bacolod

April, 2026

Science, Technology, Engineering, and Mathematics (STEM)
La Consolacion College – Bacolod

May, 2021

Experiences

Web Development – Devfest 2023 Masskara Festival Exhibition

2023

Designed and developed a website to showcase the 2023 MassKara Festival Exhibition, highlighting event information and visual content representing Bacolod City's cultural celebration.

Quality Assurance

2022

Performed system testing to identify bugs, validate functionality, and ensure the reliability and performance of web applications.

Web Application Development – USLS Exhibition 2.0

2024

Participated in Sustainable Development Goals Application development, focusing on user experience and backend functionality.

CCS Start-Up Battle – USLS Exhibition 3.0

2025

Showcasing our innovative solutions through a three-minute pitch and a five-minute Q&A session

Capstone

2025

Developed a full-stack web and mobile e-commerce platform that enables public market vendors to sell vegetables online and reduce produce waste.

Internship – HRIS Development Project

2026

- Contributed to full-stack development of a Human Resource Information System (HRIS) featuring employee management, attendance logging, and role-based access control.
- Developed frontend interfaces and backend modules using modern web technologies.
- Assisted in QA testing, bug identification, validation, and debugging processes.
- Utilized AI-assisted workflows for requirement clarification, documentation support, issue investigation, and development productivity improvements.
- Participated in system refinement to improve reliability and usability.

AI Prompt Engineering and MCP Workflows (2024–2026)

- Developed structured prompts for software development, debugging, QA processes, documentation, and research tasks.
- Configured and utilized MCP integrations for development assistance and workflow automation
- Used AI tools to improve development productivity and workflow efficiency.
- Assisted with code analysis, requirement interpretation, technical summarization, and test preparation.
- Applied AI workflows in frontend, backend, and mobile development environments.

Seminars and Workshops

State Sync: React

2025

Learned the fundamentals of the React framework, including component-based architecture, state management, and building dynamic user interfaces for modern web applications.

Cyber Security for National Security — Col. Francel Margareth P. Taborlupa

2025

Attended a cybersecurity seminar discussing the role of cybersecurity in national security, digital threat awareness, and protection of critical information systems.

TechTrack: Mapping Your Own Future

2025

Participated in *TechTrack: Mapping Your Future in Tech*, a technology seminar that provided insights into emerging tech trends and career opportunities in the industry.

DevFest Bacolod 2025 — Google Developer Groups

2025

Attended a developer conference featuring talks on modern web development, cloud technologies, and emerging software engineering practices.

Projects

Human Resource Information System (HRIS)

- Developed a full-stack HR system for employee management and time logging.
- Implemented role-based permissions and CRUD operations for employee data.
- Built using React, PHP, MySQL, and Vite.

ProDuce – Web and Mobile application

- Developed a **full-stack web and mobile e-commerce platform** that enables public market vendors to sell vegetables online and reduce produce waste from spoilage.
- Implemented a **mobile application for vendors and a web-based admin panel** to manage products, orders, and system operations.
- Built the system using **Vanilla PHP, MySQL, Flutter, and Dart**.
